

Yue Tong MD PhD

MD · PhD | Life Sciences Professional | Translational Research

@ yue.tong94@gmail.com +44 7343017266 https://bagel-yt.github.io/ www.linkedin.com/in/yue-tong Guildford, GB

MD and PhD scientist with a track record in translational research, international project coordination, and scientific communication across academic, clinical, and industry settings. Led multi-institution research programmes across four countries, bridging bench science and strategic contexts. Combines experimental depth in iPSC disease modelling, CRISPR/Cas9, and transcriptomics with strong cross-functional collaboration and the ability to translate complex science for non-specialist audiences.

EXPERIENCE

Visiting Researcher – Cancer Evolution

University of Surrey

Nov 2025 – Present Guildford, GB

- Developing computational approaches for cancer evolution and genomic data analysis.
- Collaborating with academic and clinical researchers on translational genomics projects.
- Presenting scientific findings and supporting external research collaborations.

Doctoral Fellow

ULB Center for Diabetes Research

Oct 2020 – Sep 2025 Brussels, BE

- Led interdisciplinary research projects spanning stem cell biology, genome engineering, transcriptomics, and diabetes disease modelling.
- Coordinated a 6-institution, 4-country consortium (ULB, Exeter, Stanford, KU Leuven), aligning scientific objectives and co-authorship across teams.
- Translated mechanistic findings on monogenic diabetes into clinically actionable insights, connecting basic research to diagnostic and therapeutic implications.
- Identified emerging scientific opportunities and translated research findings into potential therapeutic and translational applications.

Graduate Research Fellow

National Key Laboratory of Diabetes Immunology

Sep 2017 – Jun 2020 Changsha, CN

- Coordinated clinical research activities involving diabetes patient cohorts, clinicians, researchers, and study participants.
- Managed large clinical datasets and translated findings into actionable scientific insights for multidisciplinary research teams.
- Designed standardised protocols across multiple studies, improving data quality, consistency, and project delivery.
- Supported communication between clinical and research stakeholders throughout project execution.

LANGUAGES

Mandarin (native) English (professional) Cantonese (conversational) French (basic)

CORE COMPETENCIES

Scientific Communication

Cross-functional Collaboration

Stakeholder Engagement

Project Coordination

Business Development

Partnership Development

Opportunity Identification

Life Sciences Strategy

EDUCATION

PhD Biomedical & Pharmaceutical Sciences

Université Libre de Bruxelles

2020 – 2025 Brussels, BE

Master of Clinical Medicine

The 2nd Xiangya Hospital, Central South University

2017 – 2020 Changsha, CN

Bachelor of Clinical Medicine

Xiangya School of Medicine, Central South University

2012 – 2017 Changsha, CN

SELECTED ACHIEVEMENTS

International Speaker
Invited and contributed talks at EASD, ISPAD, and IDS congresses; engaged academic, clinical, and industry audiences.

10 Peer-reviewed Publications
Co-first author, *Nat Rev Endocrinol* (2025); first author, *EMBO Mol Med* (2026).

F.R.S.-FNRS Doctoral Fellow
Recipient of a highly competitive Belgian national doctoral fellowship (2021).
